

Hello,

My name is Runcy Oommen and I'm a software and security systems engineer based out of Bangalore, India. I came across the opening in your company and it spiked my interest.

The requirements you mentioned in the job profile seems to be cut out as per my experience and it would it be a privilege if you could provide me an opportunity to have a discussion/interview. I'm confident of achieving total justice to the listed responsibilities of the job description. My resume is also attached along-with, which provides more in-depth look of my qualifications and achievements.

I'm sure you must be busy, so even 15 minutes would be appreciated to discuss further if you find my profile suitable. Looking forward to a positive response from your end.

Thanks,
Runcy Oommen
